

Features in Version 7

- Archive has a customizable output location for the archived files which allows for archiving to a network location, pen drives or external hard drives.
- Users can now archive and restore the PLU / UPC polling data separately. The PLU / UPC is the most commonly used file.
- Merge feature allows users to merge previously created report archives into their current polling database files to be used as a restore option if reports are accidentally deleted or as a Corporate Solution.
- Individual sites can auto email/FTP their reports to Corporate, then Corporate can merge the report data into their copy of V7 Polling for viewing, printing or consolidating.
- When restoring after a crash or switching to a new computer, Archive Agent allows users to transfer all collected data including setup files and data files, saving users time reconfiguring the software on a new PC.
- Custom naming option helps separate stores.
- The software can be setup with the Version 7 calendar to automatically run and archive data.
- Archive Agent's Auto Email/FTP feature works with the Version 7 Calendar to automatically Email/FTP archived files to another location for off-site backups or corporate polling. Files can also be emailed to Support@pcpoll.com for help.
- FTP upload & download options Allow for quick file transfers

FTP Upload Screen: This option allows you to archive and FTP Log, Setup, Report, All Program, Keyboard, Employee/Server, PLU/UPC, Inventory, All Files and QuickBooks Interface data from the current V7 Polling data directory.

Email / FTP Option

- The email & ftp option allows users to archive and email/FTP Log, Setup, Report, All Program, All Files, PLU/UPC, Keyboard, Employee, and Custom data from the selected V7 Polling directory.
- You may also archive and email QuickBooks Interface V3 and Inventory data.
- Archive Agent saves users on down-time. With email/FTP options configured, users can email/FTP database files to support@pcpoll.com for help.
- Use the Auto Email/FTP feature for corporate polling.
- Use Auto Email/FTP to view files at home or while on vacation.
- Backing up data is quick and easy with the Auto Email/FTP

E-mail Screen: The E-mail option allows you to archive and e-mail data from V7 Polling, Inventory and the QuickBooks Interface V3.

Features of Archive Agent for Version 7

- Archive Agent interfaces with all V7 Polling registers: Casio, Sam4s, SHARP, and TEC.
- Archives PC/POLL SYSTEMS Polling, Version 7 Inventory, and QuickBooks Interface V3 data. It is a complete backup for all Version 7 products.
- Allows users to Archive, Restore, and Delete files from their polling directories.
- Polling archive and restore options are divided into sections such as archiving just the setup files or just the report files.
- User prompts to guide the user through the software.
- Data is compressed and stored in Zip files.
- User friendly interface with easy to use Help Files.
- Software displays messages for successful and unsuccessful actions.
- All options process quickly and are easy to execute.
- This program can be used to backup software data and to recover lost data.
- Corporate polling features include emailing/FTP options and data file merge.

Main Screen: This is the main menu screen. From here users can enter the different areas of the program. This is the Setup Files area.

Archive Section

- Allows users to archive Log Files, Setup Files, Report Files, PLU / UPC, Keyboard, Employee, Custom Files, all their program maintenance, all their data files from Polling, Inventory, and QuickBooks Interface. The software knows the location of the data to archive saving you search time looking for the files.
- This section will create, compress, and name the zip file for the user.
- File names will state the type of archive along with a date-time stamp. Sample file name: Report 7_28_2003 1_54_00_PM.zip

Archive Screen: From here, users can archive Log Files, Setup Files, Report Files, All Program Files, All Files, PLU/UPC files, Keyboard, Employee, and Custom Files from Polling. Also, all Data Files from Inventory and QuickBooks Interface V3.

Restore Section

- Users are able to restore Setup Files, Report Files, All Program maintenance, Select Program, All Data Files, PLU / UPC, Keyboard, Employee, Custom, Inventory and QuickBooks Interface V3 Data Files.
- The program takes the zip files created within the Archive section and extracts them to the current data locations.
- Users can choose specific machine, PLU/UPC, Keyboard or Employee files they want to restore within the Select Program or PLU/UPC Key Board or Employee file restore options.

Delete Files Section

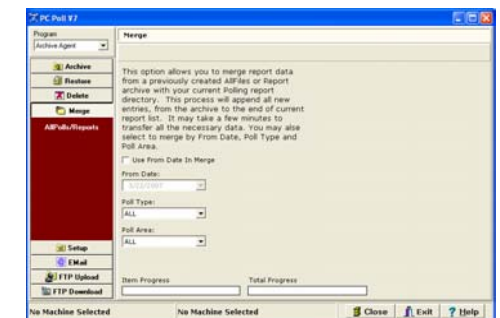

- Allows users to Delete Log Files, All Report Files, and Selected Reports.
- Deleting Files allows V7 Polling to run faster and more efficiently by cleaning up your databases.
- Deleting Files allows for quicker viewing and consolidation of V7 Polling reports.
- Clear Log files options leaves the databases on the system and just closes the tables.
- Custom delete allows users to delete select file types.

Delete Screen: From here users can Delete Log Files, All Report Files, Clear Logs and Selected Reports

Merge Section

- Allows users to merge reports based upon report options
- Users select a From Date, Poll Type, and Poll Area.
- Users can choose between X Reports, Z Reports or All (both X and Z Reports).

Merge Screen: This allows users to merge report data from previously created AllFiles or Report archive with your current Polling report directory.
