

AML LDX10 WINDOWS 10 CREATIVE UPDATE

Perform the steps below to resolve a known issue with WMDC and Windows 10 (after the latest 1703 Windows 10 "Creative Update").

Go to the **Services** applet. (shortcut: [**Windows key**]+[r]... type **services.msc**)

Double-click the "Windows Mobile 2003-based device connectivity" service (to view its properties). Choose the **Log On** tab and select **Local System account** as the log on mode.

You should now be able to start the service in Services Manager and WMDC will work as expected again.

Note: If the above fails to remedy the connection, please try going through an *AC powered USB hub*.
