FOR IMMEDIATE RELEASE

## **Tri-Technical Systems' AIMsi v12 Integrates with iTouch**

iTouch Technology and Tri-Technical Systems are excited to introduce a seamless integration between the iTouch 4473 and the AIMsi v12 business software solution for firearms retailers. This dynamic integration allows retailers to electronically complete and process the ATF Form 4473 and NICS background checks for their customers. Customers will have the ability to fill out the ATF Form 4473 at a kiosk, touchscreen computer or Windows tablet. Customer's information can be scanned from a driver's license or entered manually for population into the 4473 Form. iTouch 4473 provides an 'error check' that helps to make the submission process seamless and prevents any manual errors, while also alerting the clerks for any errors that could prevent sales. Sales transactions will be completed in AIMsi v12 with firearm information being automatically entered into the electronic Gun Book. This streamlined process will increase security with purchase details compiled with double verification of serial numbers.

"We're excited about our integration between AIMsi v12 and iTouch 4473. The electronic submission will save our customers time, increase security and help maintain a more accurate database," says CEO, Paul Acton.

Call your AIMsi sales personnel at (800) 670-1736 or iTOUCH (904) 372-4501 to inquire about this new digital 4473 technology with AIMsi POS integration.

### **About Tri-Technical Systems**

Since its foundation in 1984, Tri-Technical Systems has become an industry leader in providing business solutions for retailers. Over 4,500 retailers across the United States and Canada are growing their business with greater predictability and more profitably with the help of Tri-Tech's product suite.
