

Instructions for installing the Scanshell 800R interface.

Tri-Tech does not sell the Scanshell 800R or the required ID Scan software. You can order the hardware and software directly from Card Scanning Solutions. Our contact at Card Scanning Solutions is Robert Baxter rbaxter@card-reader.com 213-867-2626

Here are the links to the two products that you need to purchase from Card Scanning Solutions.

This set of instructions assumes that the drivers for the Scanshell 800R have already been installed and that the scanner has been set up. If not, review installation instructions that come with the Scanshell 800R and install the scanner drivers. Note that the computer must be rebooted after the Scanshell drivers are installed.

1. If AIMsi is not installed, install AIMsi first.
2. Run the setup program AIMsiScanshellSetup.exe and follow the onscreen instructions.
3. On the Select Destination Location page, select the AIMsi folder as the destination folder. This may be on a local drive or a network drive.
4. If AIMsi is installed on a network drive and multiple computers access it, the setup program must be run from each computer. On the Select Destination Location page select the AIMsi network location for each computer. Answer 'yes' when prompted that '...already exists. Would you like to install to that folder anyway?'
5. During installation three DLLs will be registered on the local computer. If you receive a message that the registration failed, you must register the DLLs manually.
6. After installation has finished, reboot the computer.
7. After rebooting, start AIMsi and go to Maintenance | General Maintenance | Work Stations and to the POS tab. Check the Enable Scan Shell checkbox.
