Tri-Technical Systems Receives 2017 FrontRunners Award

Tri-Technical Systems has been placed on the Gartner's FrontRunners quadrant for retailers' top-products with their point of sale retail software, AIMsi. Within the quadrant, AIMsi is named one of the top three highest-rated solutions in the industry, offering one of the highest values and capabilities in that market.

The FrontRunners quadrant is powered by Gartner methodology and based primarily on user reviews across Gartner Digital Markets. As a Gartner Company, the Software Advice FrontRunners analysis is a data-driven assessment identifying products in the retail point of sale software market that offer the best capability and value for small businesses. For a given market, products are evaluated and given a score for the capability (x-axis) and value (y-axis) they bring to users.

To date, AIMsi has received 128 reviews and averages a **4 out of 5 star-rating** on Software Advice. AIMsi is a completely integrated and robust point of sale and retail management solution that offers inventory control, automated purchasing, customer management and loyalty programs, sales reporting, employee security and more. AIMsi is a module-based POS software tool.

An example of one of the valuable reviews is feedback left by one of AIMsi's customers, Mark. Since 1986 Mark Henkels has owned and operated Deluca Music, Co.

"I've been using this software since it was in DOS! The improvements over the years have helped our business run more efficiently and given us the ability to provide better service for our customers." – Mark from Deluca Music Co.

FrontRunners scores and graphics are derived from individual end-user reviews based on their own experiences, vendor-supplied information and publicly available product information; they do not represent the views of Gartner or its affiliates.

About Tri-Technical Systems
Since its foundation in 1984, Tri-Technical Systems has become an industry leader in providing business solutions to retailers. Over 4500 retailers across the United States and Canada are growing their business with greater predictability and more profitably with the help of Tri-Tech's product suite.
